

ioFABRIC Vicinity Server SAN

To-Do list always growing?

Need to scale but your budget can't keep pace?

Realize an immediate ROI

Remove the risk and cost of having to rebuild totally and start again.

Increase storage efficiency, reduce management time, and eliminate storage silos.

Drive business innovation with intelligent storage

Transform commodity into a distributed, enterprise-class platform.

Imagine an easy-to-manage, scalable storage platform for massive data growth, without the massive costs.

Increase storage efficiency, reduce management time, and eliminate storage silos with scalable, server-based storage.

ioFABRIC Vicinity provides all the features and benefits of traditional SAN storage, but without requiring an expensive, vendor-locked physical SAN.

Realize an Immediate ROI

Experience immediate time-to-value with ioFABRIC Vicinity. Reduce CAPEX by breaking from vendor-locked expensive traditional SAN systems, increasing storage efficiency, and growing with commodity hardware and cloud. Drastically cut OPEX with intelligent automation and orchestration. Reduce overall TCO through improved efficiency and agility.

Drive Business Innovation with Intelligent Storage

Intelligent software that transforms commodity hardware into a distributed, enterprise-class storage platform. ioFABRIC Vicinity's simple dashboard control, automation, and orchestration abilities reduce the complexity of storage and allow you to simply deliver. Vicinity reduces admin demands and frees IT's time to focus on true business innovation.

Eliminate Downtime and Risk

Keep your mission-critical applications running with ioFABRIC Vicinity's built-in high availability, snapshot, recovery, and automatic healing features. Dynamic replicas ensure data integrity and maintain application uptime. With Vicinity Server SAN you can ensure business continuity, backed with the highest levels of data protection and availability.

Embrace and Extend Existing Storage

Unlike other solutions, ioFABRIC Vicinity does not create another storage silo in the organization. Migrate data to Vicinity Server SAN simply, and cooperate seamlessly with traditional SAN, NAS, flash appliances, and cloud. Scale performance and capacity independently and without limit. Vicinity creates a unified storage environment that enables cross-vendor data mobility both on-premise and cloud.

Achieve Application-Level QoS

Industry unique service-based intelligence maintains QoS levels across performance, capacity, and data protection. ioFABRIC Vicinity monitors and moves performance-starved data to the fastest storage and leverages slower storage resources in less demanding roles. Dynamic data mobility monitors and adapts in real-time as demands and workloads change.
